KK - FRP and Konkrete Products Pvt. Ltd.*

core, we incorporate eco-friendly practices into every operations. The company follows environmental friendly manufacturing and production methods. It is committed to recycling wastes generated from its own production and thus advocating circular economy and also switching to solar power energy. Further, the company uses sustainable practices with our finished goods. Our company prefers to bring back the defective finished goods back to the plant for it to be recycled and reused in the production again. With regards to wastes that's impossible to recycle, we offer sustainable waste transportation services to reduce our environmental impact.
